DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Permanent magnet reluctance motor with embedded permanent magnet holes.

Claim Objections

Claim 1, 2, and 4 are objected to because of the following informalities: Claim 1 line 7- 8 need to be clearer in the structural explanation of the permanent magnet with relationship to the permanent magnet embedding hole. In claim 1 line 10, replace "region" with "regions". Line 12 of claim 1, insert "and" after the semicolon. In claim 2 line 23 replace "to" and replace with "of". Claim 4 line 13, replace "is" with "are".

Appropriate correction is required.

Claims 5-10 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 1 line 15-17, delete "in such a way" and provide a structural explanation of the projections with regards to the relationship of the permanent magnet and the rotor core.

Claims are allowable if 35 U.S.C. 112 rejections are addressed.
